My Contributions to the creation of Tally (Git-Hub):

<https://github.com/Roebuck-Catherine/Team-4-F14-CIT261/graphs/contributors>

- I wrote 11, 630 Lines of Code with 72 commits, while Jessica wrote 2,014 with 9 commits and Catharine only wrote 186 lines of code with 12 commits (Catharine is both, "Roebuck-Catherine, and "zekegeek").
- **In essence, I wrote 84% of the code required to make tally work.**
 - This goes to show that I have a concise understanding and have mastered the topics covered in this course.

Running Application:

Credentials to get in...

Org Name: finalGrade

Password: admin

User: Grade, final - brycefransen@gmail.com

User Password: admin

Other Contributions I made, NOT MENTIONED in the presentation:

- I implemented necessary code to provide "Web App" mode on iPhone platforms.
 - This includes a mobile Icon
 - Disabling double click to zoom function to ensure that the plus button can be pressed rapidly
 - Sets the viewport to mobile and disables page zooming altogether.
- Designed and developed the ENTIRE database side of tally.
 - All model.php files necessary to communicate and process data to the database were written SOLELY by me.

- ALL forms and validation of forms were created and written by me
- ALL final AJAX calls were written by me
- ALL local storage implementation was done by me
